 Skydrop

- Cloud based integration
- Individual Water Zone control
- Custom global icon
- Enable/Disable watering schedules
- Pause watering for 8 hours (customizable) with a single button push
- Launch Skydrop portal (T3 touchscreens only)
- Disable control for renters
- Event and Conditional based Composer programming to create a customized integration for your customer

## Purchase at DriverCentral.io

Professional Landscape integration using the Skydrop Arc or Halo and Cinegration Skydrop Pro Control4 driver. Creates a single icon for global control of sprinklers. Want individual control? We've got that too! Simply bind the Control4 sprinkler relay driver or the sprinkler timer driver and unleash the best in class smart watering integration.
